Best & Hottest Products 2009

Barbara Armondin and Tina Wysk,
Founders, MetroplexBaby.com

MetroMoms, (bestandhottest.com) Dallas-Fort Worth's premier events program for new & expectant moms and families, names the "Best & Hottest Products From Pregnancy To Preschool™" quarterly. The products for this signature event are chosen by a team of editors, and approved by MetroMoms founders and owners. The products are described to readers through editorial and photos, and displayed at popular luncheon or moms' night out events where each mom in attendance will win one of the items. Please visit BestAndHottest.com for more information. The top picks for the first of the 2009 Best & Hottest Features are below.

Introducing Trends for Kids ("TFK")... Extremely popular in Europe, this German company's high quality, innovative, sporty and versatile strollers just arrived in the U.S. and already are an instant hit. We are amazed with the details and extra features on these strollers like detachable mosquito netting that stores in the sunshade, bicycle style DISC brakes with hand brake, suspension system, reflective stitching, water-resistant washable materials, and multi-position ergonomic seats featuring breathable mesh material and a lumbar and back support system. All TFK strollers fold and set up in seconds and allow a carry cot and/or car seat to be added to accommodate infants.

The Twinner Twist Duo side-by-side double stroller is narrow enough to fit through standard

size doorways and allows each child customizable comfort and may be used with 2 bassinets OR 2 seats OR 1 bassinet and 1 seat.

The Joggster III is a multipurpose sport stroller for those who also enjoy a bit of luxury.

It features a suspension system with rear shock absorbers which, together with the inflatable all terrain tires, provide your child with an ultra smooth ride. It has a fixed front wheel for sports that may be switched with the swivel wheel accessory for everyday use.

The Joggster Twist is a stroller intended for those who enjoy moderate activities such as walking and the convenience and versatility of a multi-purpose stroller. The swiveling front wheel is ideal for everyday uses and allows for excellent maneuverability.

The Buggster S is a small compact stroller that offers the comforts of a larger sports stroller. It features a wide reclining seat, suspension system and foot rest. Lightweight and strong, it is perfect for travel, shopping or everyday use.

TFK thought of everything!

Küster's jellybaby changing mat is the first ever memory foam changing mat to be ergonomically shaped to hug your baby's curves. It is simple to wipe clean and it comes with a 100% cotton, machine washable liner. The special high tech material is warm to the touch, cradling your baby in softness and it's free from PVC!

Your kids may have 'collected them all' but wait until you see the Award Winning Uberstix construction kits. They are engineered to work independently and/or integrate with all other major building systems including Lego and K'nex as well as recyclable materials you collect around the house! **The Uberstix™ Sailboat** uses recycled water bottles to make it float, and includes a lab sheet lesson plan that teaches the basics of sailing and the function of the keel and rudder. **The UberBird™** has wings that flap and teaches kids about the workings of movable joints. Uberstix inspires creativity while teaching kids concepts in geometry, math, engineering and basic physics.

Welcome to M1, the new level in baby carriers. **Lascal's M1** offers baby as well as parent the ultimate in comfort

with its sporty and fashionable look and its high tech ventilated fabrics. The innovative three-way adjustable front piece creates a secure and perfect fit for babies weighing 8-30 lbs. The bamboo fabric top cover removes for easy cleaning and also functions as a canopy against sun and wind.

A ventilated lumbar support keeps baby's weight evenly distributed (minimizing strain on your lower back) and a unique, built-in back support in the front piece keeps baby's developing spine straight at all times. Ergonomically designed buckles make the M1 quick and easy to use. M1 is available in a variety of vibrant state of the art colors.

Bending down to change or bathe your baby can be a pain. **PRIMO's new EURO SPA Bath and Changing Center™** offers the convenience of a baby bathtub on a stand and portable changing table center in one! Perfect for your 0-24 month old, the bath is designed with 2 positions to comfortably accommodate a reclining infant or sitting toddler. A long drain tube allows the bath to be easily drained without lifting, and plenty of storage holds all your supplies within easy access. The stylish portable stand with 2 locking wheels allows the Euro Spa to be easily moved from the bathroom, kitchen, bedroom or any room in the house. Easy to clean and made of non-toxic Polypropylene plastic, the Euro Spa is PBA Free, Phthalate Free, and Lead Free.
